To whom it may concern.

I have been asked to give a character and work related reference for Peter Taylor of APS - Coolham Road, Coolham. Sussex.

MSI and BZc International Ltd both companies I have work for have employed Peter Taylor. Mainly for installation work involving swimming pool filtration systems and surround piping plus other areas related to pools'

This covers a time from 1994 (?) to recently.

He was also involved yet not in charge of an installation for BZc carried out for Southern Water for the UK largest ammonia removal plant installed in Sussex -a section of this plant is shown on our web site www.zeoclere.com

We use him for four reasons - He's honest with his time, tidy on site - is observant for possible future mechanical on site problems - and an attitude in commerce that may be seen as old fashioned in some eyes - but gives us comfort.

I am sorry that this has arrived by email - but I've been away from my desk for 10 days.
