ESPA Innovative Solutions

The best materials for your pump

Long service life thanks to research to improve the quality of materials and manufacturing processes.

From raw material to finished product

Our integrated production chain ensures efficient control of the production process, from sourcing to final distribution.

Sustainability and durability

Our pumps are robust and reliable, not only because of the durability of the materials and the solidity of their manufacture, but also because of the availability of spare parts and the

All our pumps are Recyclable

95% of the components in our product range are recyclable.

Tekbox

Description

Tekbox IPR

Prefabricated technical box for sunken fitting in the garden. Perfectly blends in with the environment. Innovative, all-in-one solution, compact enough to store all the equipment required for the proper functioning of the swimming pool up to a pool volume of 150m³. High level of water tightness, providing total protection for components. Can be fitted with several options including control Panel, automatic backwash, boost pump for swim-jet, boost pump for bottom cleaner e.g. Polaris etc and Puronizer System for low level chlorine control. Please enquire for full options. Tekbox is the only prefabricated technical box on the market with which you can increase the swimming pool's equipment and functions progressively, with gradual investment. Tekbox is an all-in-one solution, which is convenient, quick and profitable for the installer and for the end user it is safe, attractive and saves on additional installation costs.

Tekbox IPR

Version

Tekbox IPR: Thanks to its totally sunken design, it camouflages perfectly, blending in with the environment.

Characteristics High resistance: Strengthened injection-moulded thermoplastic that keeps its shape perfectly.
Stability: System for ground anchoring to avoid any movement or flotation.
Security: Reinforced lock and hinges.
Look: Design and colour that blends in with the environment.
Versatility: Full pre-fitted filtration-pump-valve units compatible with various add-on functions.

Standard unit components:

Tekbox pre-fitted technical box.

Blown or injection-moulded ESPA Pool filters, up to Ø 650 mm, pool volume up to 150m³ Compact centrifugal pumps from the ESPA range, up to 1.5 HP.
6-way selector valves.

Options:

- Swim-jet boost pump MX55/S & MX 70/T
- Puronizer system (for low level chlorine control)
- Impulsion pump for pool bottom cleaner (i.e. Polaris cleaner)
- Submersible pump for any water spillage within the Tekbox
- Control panel (see options below)

Example of equipment inside Tekbox

Description

Above ground Tekbox

An alternative to the sunken Tekbox above, an all in one solution compact in size with two different sizes of filters and pumps. Completely plumbed and pre wired ready for installation. Plug and play mains socket for quick installation.

Filterkit Plus

Filterkit Plus with side mount valve

Description

Filters with valve made of chemical and weather-resistant modified polypropylene.
Injection-moulded with the two halves thermally welded.
Highly versatile, top or side-mounted, 6-way valve.
Maximum quality from Ø 520 to 760 mm for swimming pools up to 184 m³

Characteristics

Working pressure 2.5 bar; maximum pressure 3.5 bar.
Connection with 1½" 6-way valve for Ø 520 and 620 mm models; 2" for Ø 760 mm models.
Fitted with pressure gauge and air purge valve.
Double drainage in the lower section of the filter to allow total emptying of water for maintenance. ½" drain plug to allow water to drain without releasing any filter sand.
Transparent cap on the side-mounted version for easy inspection.
Valve joint/cap (depending on top- or side-mounted version) to the filter via a Ø 203 mm anti-blockage seal.

Silen I Swimming Pool Pump

Quiet-running single-stage centrifugal pump, self-pı 3 ıg, complete with pre-filter

Applications
Recirculation and filtering of water from small and medium swimming pools.

Materials
Pump body, pump foot, impeller, seal mounting and diffuser in technopolymer.
Motor shaft in stainless steel AISI 431.
Special mechanical seal in AISI 316.
Motor housing in aluminium.
O-rings in NBR.
Bearings up to 160° C

NEW DESIGN

NEW MATERIALS

ULTRA-SILENT

SELF-PRIMING 4m

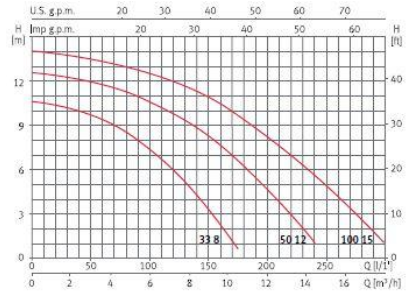

EXTENDED WARRANTY

Motor
Asynchronous, two poles.
IP 55 protection.
Class F insulation.
Continuous operation.
Single-phase version with built-in thermal protection.
10.000 hours P2 capacitor with aluminium casing.

Equipment
Supplied with suction and discharge unions (metric 50 mm or Imperial 1½")

Pump body, pump foot, impeller, seal mounting and diffuser in technopolymer. Motor shaft in stainless steel AISI 431. Special mechanical seal in AISI 316. Mechanical seal in graphite and alumine.
Motor housing in aluminium. O-rings in NBR. Bearings up to 160° C.

Motor
Asynchronous, two poles. IP 55 protection. Class F insulation. Continuous operation.

Equipment
Supplied with suction and discharge unions.

Silen Plus Pump Curve

***evo**pool®*
The Silen Plus includes a frequency inverter with a major innovation in its operation to adapt it for usage in pools: the speed variation in the swimming pool working cycles. Silen Plus includes an ESPA pool pump and a frequency inverter with a major innovation in its operation to adapt it for usage in pools.
***evo**pool®* Control System
The ESPA control system detects the position of the selector valve and transmits it to the pump to automatically activate or deactivate the operation cycle depending on the position.

MX72 Swim-jet or spa boost pump for all of our counter current system's

Description

Single phase centrifugal pumps designed for the recirculation of swimming pools, Jacuzzis and for swim-jets, with flows up to 72 m³h. Complete with union connections and central suction. Drainage spout on the pump casing.

MX72 Pump Curve

Materials

Pump casing, pump base, diffuser, impeller and seal mounting in technopolymer. AISI 420 stainless-steel drive shaft. Mechanical seal in graphite and alumine, L-2521 alumine motor casing and windings mechanism impregnated with epoxy resin. NBR gaskets.

Motor

Dual-pole, asynchronous. IP-55 protection. Class F insulation. Continuous operation. Single-phase version with built-in thermal protector.

MX500 Boost Pump for all of our counter current system's

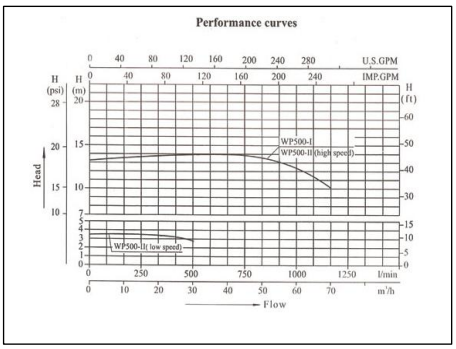

Description

Single phase centrifugal pump designed for the recirculation of swimming pools, Jacuzzis and for swim-jets, with flows up to 70 m³h. and central suction. With drainage spout on the pump casing. Supplied with suction and impulsion adaptors.

Motor

Dual-pole, asynchronous. IP-55 protection. Class F insulation. Continuous operation. Single-phase version with built-in thermal protector.

Nadorself single/three phase swim-jet pump

Description

Single-impeller centrifugal pump specifically designed for jet-stream currents, with flows up to 75 m³h. Self-priming up to 4 metres. With 2 drainage spouts on the hydraulic casing. Adjustable impulsion. Supplied with suction and impulsion accessories.

Materials

Pump casing, pump base, diffuser, impeller and seal mounting in technopolymer.
AISI 420 stainless-steel drive shaft.
Mechanical seal in graphite and alumine, L-2521 alumine motor casing and windings mechanism impregnated with epoxy resin. NBR gaskets.

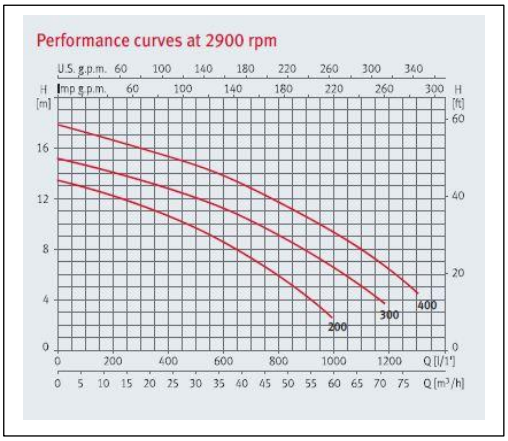

Nadorself swim-jet or boost pump

Motor

MX Swim-jet range

Description

Hydraulic units specially designed for jet-stream currents. Range compatible with MX, Nadorself and Wiper pumps. Easily installed in any type of pool.

MX 70/T 140/T X-stream Swim-Jet

Components

MX140/T & MX70/T X-stream Range

The MX Range has twin jets, S/S face plate with grab rail, plate-mounted positionable nozzle with flow regulator. Plate-mounted pneumatic button. For liner pools, Wooden pools and concrete pools.

MX70/S Swim-Jet

MX70/S

The MX70 single swim-Jet has a round ABS face plate. Plate-mounted positionable nozzle with flow regulator. Plate-mounted pneumatic button and air regulator. Fittings for the installation into lined or concrete pools. Hose massage kit (optional).

Jetbox to house swim-jet motors

Jetbox is to house swim-jet pumps. Completely plumbed and wired ready for installation.

The above plumb kits consist of all the pipe & fittings required for a basic behind the wall installation. You may need to purchase extra fittings to complete your installation. Full list of fittings on request.				

Puronizer System for Swimming Pools *a British made product*

The Puronizer system is a British manufactured ioniser system for use in swimming pools. The Puronizer system brings to the pool owner a simple to use method of ensuring high quality water with very little effort and no algae. From installation, the Puronizer works totally silently. As your pool water passes through the in line cell unit, copper and silver ions are released into the pool killing bacteria and algae.

CONDITIONS FOR OPERATION

- Voltage rate: 110v - 220v 50 and 60 Hz
- Maximum working pressure 1.5 bar
- Maximum working temp. 110F - 45c
- Pipe size: 1.5 BSP or 50mm plain
- Installation time less than 1.30 hrs
- Flow rate through cell max 3,000 galls/hr (14,000 litres)
- Download Installation handbook

Over 2,000 years ago the Ancient Greeks found that algae would not grow in water stored in copper containers. They also discovered that it seemed to purify drinking water. It was not until the nineteenth century that the reasons were understood and the process was established commercially. If a member of your family suffers from a skin allergy from chlorine or is asthmatic or you find chlorine affects you, then the Puronizer under set conditions can allow free chlorine to be reduced to 0.3ppm/mg/l.

If you are away from home a lot or have a holiday home overseas a Puronizer ensures that when you return the water is just as clear and free of algae as when you left. With over two decades of successful sales across the globe you can be assured your investment will give you years of service.

ADVANTAGES:

- Reduces Chlorine - ideal for asthma sufferers
- Will keep water free from algae
- Reduces chlorine consumption by up to 80%
- Bather comfort improved, especially for asthmatics
- Ideal for indoor pools where chemical smells can be obtrusive
- Ideal for holiday homes where only occupied part time
- Far less water maintenance
- Low running costs
- For use with all high grade filter media
- Copper & Silver are unaffected by temperature or sunlight
- High quality manufacturing
- Designed for use in all parts of globe
- Test kit and probe cleaning brush

SPECIFICATION:

The Puronizer System is available in 3 sizes from stock, other sizes available on request:

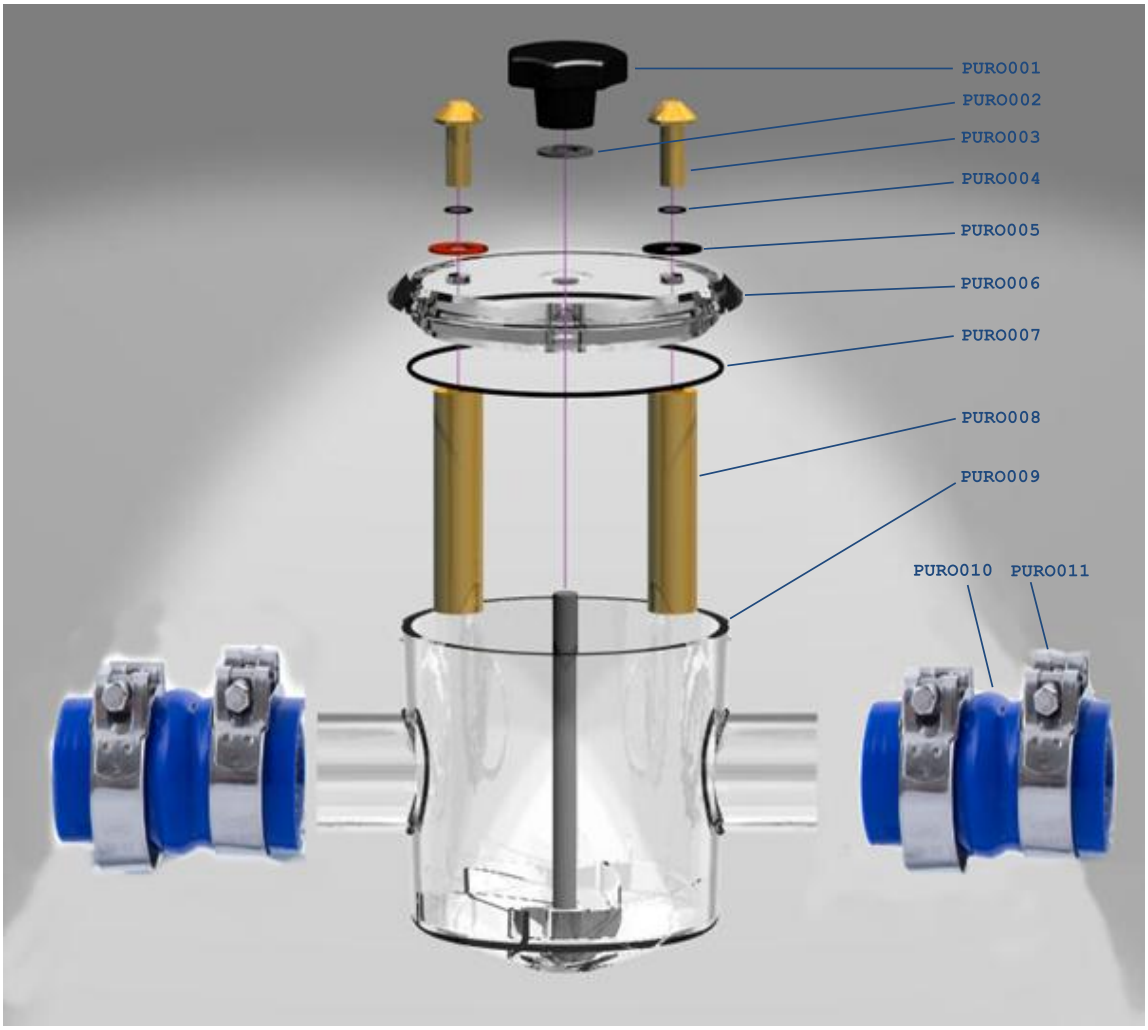

- PZ020 - for pools up to 20,000 galls imp 60cm x 60cm 36cm - weight 7Kg
- PZ030 - for pools up to 30,000 galls imp 60cm x 60cm 36cm - weight 7.5Kg
- PZ040 - for pools up to 40,000 galls imp 60cm x 60cm 36cm - weight 8.5Kg

OCEAN
automatic pool covers
by LANDY

LANDY with over 20 years of cover manufacturing.
Landy covers are available for domestic and commercial pools, indoor or outdoor, and is versatile in the applications it offers.
The ultimate in:

- Heat insulation
- Evaporation control
- Durability
- Aesthetic appearance

LANDY covers are manufactured in interlocking sections similar to a Venetian blind. Each section simulates the double glazing system, with only a tiny air gap between each slat allowing the highest degree of insulation and minimising evaporation to the pool hall. There are ten standard cover slats to choose from including solar slats with black bases to promote high solar heat transfer. A distinct advantage of LNADY covers is that rain water will pass through the cover, and will not collect on top of the cover so no need for a rain water cover pump. The roller is powered by a 24 volt motor, with remote operation as standard from a handheld key fob. All LANDY covers are manufactured specifically for individual pool requirements.
LANDY cover features:

- Reduces evaporation and heat loss
- Enhances the safety of the pool - safety lock available for new build pools
- Minimises pool debris
- Concealed stainless steel motor driven spindle
- PVC or Polycarbonate slats
- Made to measure
- In-roller motor
- No separate motor pit required
- Simple electronic calibration
- Simple installation for existing pools
- No risk of flooded motor pits

Also available by request are S/S cover pit coverings

Ocean Automatic Pool Covers

The Ultimate Cover System

Quality Assured

Ocean Above Ground Covers Please send your enquiry to info@apspooltechnics.co.uk

Aesthetically looking and more cost effective way to a cover your swimming pool. Ideal for refurbs as well as new pools, this very simple system is easy to fit to your swimming pool. You

The kit includes all the necessary parts to allow easy installation to either a pit system or an above ground installation.
Quality assured:
3 years on cover slats
3 years on cover motor
1 year on electrical components

Our most popular range of cover slats. Can be used on other cover makes to replace the slat.
3 Year warranty on the slat.

Poolflex On-Site Lining Please send your enquiry to info@apspooltechnics.co.uk

Poolflex On-Site Lining - Plain Colours, solid colours are ideal for creating an all over crisp finish. They can be combined with patterns around the perimeter, walls and floor if desired to create contrast and differentiation. Whilst solid colours are clean and even, they can highlight unevenness in the pool shell in some instances. Our extensive range of colours offers the widest choice and the highest quality. All plain colours are available in matching anti-slip variants – these can be used to complement the all over colour of your liner, or mixed with patterns and other colours to create areas of contrast on step treads, slopes, ledges and other safety areas.

Mondial Piscine

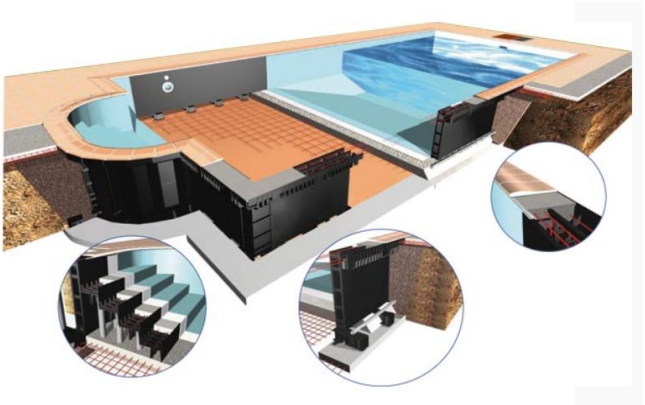

"Light weight permanent shuttering system for swimming pools spas and water features."

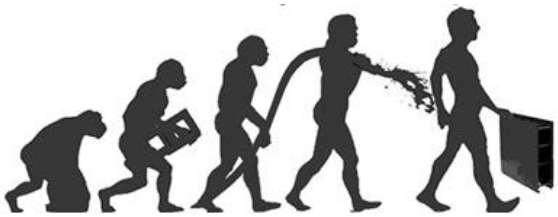

The future of pool building

"10 reasons why the Mondial Piscine shuttering System is used in over 25 countries worldwide."

- Lightweight reducing construction time.
- Continuous 150mm strong reinforced wall structure.
- No need to render the pool walls once concrete has been poured.
- Simple clip-together construction, no need for skilled labour.
- Competitive in price compared to traditional construction methods.
- Can be a tiled or liner pool.
- Can be installed above or below ground.
- Shell fittings are easily installed into polypropylene blocks.
- Mondial solid pool panels can be built in any weather. No delays on construction!!
- Great for limited access sites.

Please enquire for an estimate on complete pools or swim- spa kits that we offer.

The revolutionary flexible shuttering block

No need to render the pool walls once the concrete has been poured.
Simple "clip" together construction no need for skilled labour. Smooth seamless neat precise curves with very little effort.
Can be a tiled or liner pool. Above or below ground.
Light weight thereby reducing construction time. Shell fittings are easily cut out of the polypropylene blocks.
Mondial can be built in any weather. No delays!!
Please enquire on pricing. Full pool kits are available on request. Including a full design and sit visits service.

Pool & Spa Control Panels

APS Swimming Pool control panels can be made to any specification, please contact us if you require a bespoke control panel.

APS pool control panels offer an off the shelf, cost effective solution for pool plant room control. Each panel also includes an RCD, all switch gear and a 24hr digital time clock as standard.

1. Standard control panel for stand-alone pool equipment. Has five outputs which control:

    a. 32A MCB Air Source Heat Pump
    b. 16A MCB Spare
    c. 10A MCB Filter Pump
    d. 3A MCB Under Water Light Transformer
    e. 3A MCB Rain Cover Pump
    f. Hand held time clock [supplement]

2. Spa control panels are more complex than swimming pool control panels, our standard panel has seven outputs to control:

    a. 32A MCB Spa Electric Spa Heater
    b. 16A MCB Spa Air Source Heat Pump
    c. 16A MCB Spare
    d. 10A MCB Spa Filter Pump
    e. 16A MCB Spa Boost Pump
    f. 16A MCB Commercial Air Blower
    g. 3A MCB Spa Under Water Light Transformer

    <u>Other features include:</u>

    a. Automatic purging timer
    b. Digital thermostat (probe will fit Bowman heat exchangers)
    c. Transformer mounted in control panel
    d. Frost stat for winter operation

We can also offer all the associated spa equipment required for your spa. And design your control panel accordingly.

Model:	DESCRIPTION: **Control Panel Price List**	(HP)	Cost each:	Discount:
STD/CP	Standard single phase control panel for standalone equipment (see options below)		£ 959.00	E

SUP/FS	Supplement Frost stat (for winter operation)		£124.80	0
SUP/UWL	Supplement under water light transformer std (100w)		£101.92	0
SUP/APT	Supplement Automatic purging timer		£ 570.00	E
SUP/APTU	Supplement Automatic pool top-up		£395.20	D
A-SWITCH	Spa control - pneumatic switch		£50.00	G
A-Bellows	Air Bellows		£25.00	G
AB/CP	Single pump pneumatic air control for air blower up to 2HP		£495.00	D
If you cannot find the combination you require APS Pool Technics will design a suitable control panel for you				

SUBMERSIBLES Pumps

Tekbox submersible pump

The Tekbox submersible puddle pump is perfect to use in the Tekbox sump and chambers where low water levels are present.

Dual Control: the internal float switch can be set to the off or on position, allowing it to be used in both automatic or manual modes. This switch is easily accessible.

The pump is suitable for pumping clear liquids with soft particles in suspension. It is constructed from thermoplastic with specialist 304 stainless steel motor casing. It has a triple seal that gives it a superior resistance to wear.

Tekbox submersible pump

General use submersible pump

Stream SPA Submersible Water Pump

Perfect for emptying water fast and efficiently, can be submerged up to 5 meters of water making it great for smaller sump and water tanks. This pump is also applicable to non-wildlife pond applications and can handle debris up to 5mm in diameter. The pump is automatic and features a pendant float switch. The universal fittings allow the connection of 32mm, 25mm, and 19mm.

General use submersible pump

Cover Pump

An automatic pool cover pump designed to remove standing water from pool covers and also ideal for household water transfer applications.

The Pool submersible pump features an integrated float switch for reliable automatic operation. The pump activates when the water level reaches 2" (approx 50mm) and deactivates at approximately 1.5". (approx 40mm)

The cover pump submersible comes equipped with a low energy consumption, permanent-split capacitor (PSC) motor. The motor is mounted in a sealed, stainless steel housing and cooled by the flow of the pumping fluid over the motor housing. The pump has a wide base design for stability.

The Pool cover submersible includes a removable intake screen for easy cleaning and maintenance.

Cover Pump

A full range of Submersible are available on request from the very small to the largest 10hp including hoses and accessories 230v and 110v available.

Model:	DESCRIPTION:	Cost each:	Discount:
EGO 500	GI Submersible Puddle Pump	£218.40	A
SPA 250	Stream SPA Submersible Water Pump	£57.94	A
CTE1108	Pool cover submersible pump with 20m cable	£370.00	A
S/DH	Suction/delivery hose 6mtr 3/4”	£23.47	A

New ESPA Pool pump range warranty

The extended warranty is exclusively for the ESPA Pool pump range and its application is specified in the following conditions:

1. The geographic scope of the extended warranty is strictly limited to the countries of the EC.

2. Standard period of two years warranty from invoice date according to the general terms of ESPA guarantee.

3. Extended warranty for an additional period of two years by purchasing the product in one of the ESPA's evopool® partner accredited distributors.

4. Extended warranty for an extra year if the end-user registers the product at the site filling, at least, all mandatory fields. The limit period for product registration will be a maximum of six months from the invoice date.

In any case, the maximum warranty period is five years from the product invoice date.

The terms of the warranty extension are the same as for the standard warranty, excluding all components of pump wear during normal use, such as:

- Mechanical seal
- Gaskets
- Capacitor
- Bearings
- Pre-filter basket

APS Pool Technics. Ltd
Terms & Conditions of Sale:

1. Payment Terms

Full payment after deposit is taken is due on delivery. Delivery will occur once funds have been cleared. APS Pool Technics Ltd reserves the right to receive payment by way of electronic funds transfer. APS Pool Technics Ltd reserves the right to suspend any further performance hereunder or otherwise in the event payment is not made when due. No payment by offset is permitted. Interest charges will be added to overdue invoices at the rate of 1.55% per month (subject to any limit imposed by applicable law).
Title for goods does not pass until full payment for goods is received.

In the event that goods we have supplied are found or are suspected to be faulty, the goods will need to be returned to us at the customer's expense for inspection.

Goods remain the property of APS Pool Technics Ltd until such time as payment is received in full.

Any previously agreed discount will be immediately forfeited if terms of payment are not adhered to.

2. Cancellation

Orders are not subject to cancellation without charge under any circumstances. A cancellation charge of 40% of the order value plus VAT and any delivery and re delivery costs will be forfeit or due. Cancellation of the order must be in writing and within 7 days of placement of order.

3. Fulfillment of the order

The order will be fulfilled within a period of 30 days from its confirmation by the Customer at the latest. APS Pool Technics Ltd will inform the customer of any delays that are beyond their control. If the product is unavailable, the Customer will be informed of this as soon as possible and an alternative product offered.

4. Delivery

Delivery can only take place once the order has been confirmed by the Customer and payment made. Furthermore, APS Pool Technics Ltd reserves the right to refuse any order from a customer with whom there is a current dispute.

Delivery will be arranged by APS Pool Technics Ltd own transport or carrier and one attempt of delivery only will be made at cost. If the customer fails to be present at the specified time, then they will be responsible to arrange re-delivery at which a charge will be made.

The products delivered to the address as confirmed by the Customer, who undertakes to take delivery of the products ordered.

On delivery, the Customer is obliged to check the condition of the package and the goods. In the event of damaged goods, they should be refused and returned to APS Pool Technics Ltd after marking the consignment note "Refused Goods Damaged". APS Pool Technics Ltd must be notified within 24 hours of any missing, damaged or late delivered goods by phone and then confirmed in writing within 48 hours. E-mail: info@apspooltechnics.co.uk

No claims will be accepted for damaged or missing goods that have been signed for as "Received in Good Condition" or "Unchecked". This may affect any future claims.
Whilst APS Pool Technics Ltd and our carriers make every effort to ensure that all goods are delivered on time, we will not be held responsible for delays due to unforeseen circumstances. We recommend that delivery is secured before your workforce is sent to site to prevent wasted time and incurred costs.

Any goods returned to APS Pool Technics Ltd by our carriers due to customers “not being home” will be re-delivered and additional carriage may be charged.

5. Price

The prices are indicated in pounds sterling, excluding delivery costs invoiced in addition in the Order Form. These delivery costs are calculated according to the weight and size of the package, its destination and the method of dispatch chosen by the Customer.

Prices indicated in foreign currencies at the request of the Customer are purely for information.

Prices may be subject to change without notice. All goods quoted are subject to availability.

The prices are the prices in force on the date of the order. They include the VAT applicable on the date of the order. Any changes in the rate of VAT will be automatically passed on in the prices.

All prices exclude VAT unless otherwise stated.

For any delivery outside the territory of the European Union, unless otherwise indicated in the Order Form, customs duties and formalities are the Customer’s exclusive responsibility and the Customer undertakes to check the possibilities relating to the importation of the products into the country of delivery.

6. Warranty

All warranties are as specified by the manufacturer.
Pumps bearings/ mechanical seals/ Puronizer cell/ probes /brass studs not covered under warranty.

7. Re-Stocking Charge

Re-stocking charges are applicable and at the manufacturers rate of 40% plus VAT.

8. Methods of Payment

By cheque: payments can be made by cheque payable to APS Pool Technics Ltd

By transfer: Bank name APS Pool Technics Ltd
The order will only be accepted and processed on receipt and with cleared funds of the transfer or cheque accompanied with the Order Form or its reference.

9. Liability

Neither APS Pool Technics Ltd nor the Customer can be held liable for any non-fulfillment caused by any event that is outside their control, including in particular and not restricted to war, riot, insurrection, interruption of transport, import or export problems, strike, lock-out, shortage, fire, earthquake, storm, flood.
In addition, APS Pool Technics Ltd cannot be held liable for the use of the products ordered and delivered, since the Customer is solely liable for the use of these products by himself or a third party.

Silen Plus Swimming pool pump
